What this standard covers

This standard specifies the terms and definitions, technical requirements, test methods, inspection rules, marking, packaging, storage and transportation of biodegradable spunbond nonwovens. This standard is applicable to spunbond non-woven fabrics made from polylactic acid as raw material, melt-spun into mesh, and hot-rolled and bonded. Spunbond non-woven fabrics produced from other degradable polymer raw materials can be used as a reference. .

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W59.

Estimated length of the Chinese original: 13,167 words.
