What this standard covers

This standard specifies: Determination of zinc content in iron ore by flame atomic absorption spectrometry. This standard applies to: natural iron ore, iron ore and lump ore, sintered products including zinc content determined. Measuring range (mass fraction)

Document data

International classification (ICS): 73.060.10.

Chinese classification (CCS): D31.

Estimated length of the Chinese original: 11,164 words.

Adopted international standard: ISO 13310-1997; MOD.
