What this standard covers

This standard specifies the technical requirements for the metadata of the basic data set of the phylum Rotifera for the derivation of aquatic water quality benchmarks and the metadata of related data elements. This standard is applicable to the guidance and specification of the collection, storage and information system development of the necessary data of the phylum Rotifera when deriving the water quality benchmarks for freshwater and marine organisms.

Document data

International classification (ICS): 13.020.

Chinese classification (CCS): Z04.

Estimated length of the Chinese original: 5,588 words.
