What this standard covers

This standard specifies the technical requirements for metadata of the basic dataset of the phylum Annelida for the derivation of aquatic water quality benchmarks and metadata of related data elements. This standard is applicable to guiding and regulating the collection, storage and development of information systems for the necessary data of the phylum Annelida when deriving water quality benchmarks for freshwater and marine organisms.

Document data

International classification (ICS): 13.020.

Chinese classification (CCS): Z04.

Estimated length of the Chinese original: 6,698 words.
