What this standard covers

This standard specifies the detection of Campylobacter jejuni in food exports of loop-mediated isothermal nucleic acid amplification (LAMP) method. This section applies to the export of food in the jejunum screening to detect Campylobacter.

Document data

International classification (ICS): 07.100.30.

Chinese classification (CCS): C53.

Estimated length of the Chinese original: 9,966 words.
