What this standard covers

This standard specifies the product classification, nomenclature and basic parameters, requirements, test methods, inspection rules and their marking, packaging, transportation and storage of clockwork timers (hereinafter referred to as "timers") used in household electric washing machines. This standard is applicable to timers used on household electric washing machines (including dehydrators) with a clockwork as the power source, with a rated washing capacity of not more than 12kg.

Document data

International classification (ICS): 39.040.99.

Chinese classification (CCS): N96.

Estimated length of the Chinese original: 17,159 words.

Supersedes the earlier edition QB/T 2316-1997.
