What this standard covers

This standard specifies the physical, electrical, and logical characteristics of the UICC-ME (Cu) interface. The specific content includes the physical characteristics of the UICC, the electrical interface between the UICC and the terminal, the establishment of the initial communication and the transmission protocol, the UICC logical structure basic model, the communication commands and programs, and the application-independent files and protocols.

Document data

Chinese classification (CCS): M36.

Estimated length of the Chinese original: 137,110 words.

Supersedes the earlier edition YD/T 1762.1-2011.
