What this standard covers

This standard specifies the safe use requirements for the use of polymer materials for underground grouting in coal mines, such as purchase management, user site inspection and storage, construction site environment, construction preparations, and construction operations. This standard applies to the safe use and management of polymer materials such as polyurethane, phenolic resin, acrylic, urea-formaldehyde resin, and epoxy resin for grouting in coal mines.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): D09.

Estimated length of the Chinese original: 8,881 words.
