What this standard covers

This standard specifies the method for determination of ammonia-insoluble molybdenum content in roasted molybdenum concentrate. This standard is applicable to the determination of ammonia-insoluble molybdenum content in roasted molybdenum concentrate. Measuring range: 0~30%.

Document data

International classification (ICS): 77.120.99.

Chinese classification (CCS): H14.

Estimated length of the Chinese original: 10,113 words.
