What this standard covers

This standard specifies the metal and nonmetal underground mines (including associated radon and its daughters mine) in the safety evaluation, design, construction and mining process of the underground ventilation system assessment and accreditation standards. This standard applies to metal and nonmetal underground mines (including associated radon mine) safety assessment, design, construction, and mining. Also applies to furrow pit used to develop part of the underground workings. This standard does not apply to radioactive ore, coal, coal pyrite and other minerals and coal mining symbiosis. This standard does not apply to oil, gas, mineral water and other liquid or gaseous mineral mining.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): D09.

Estimated length of the Chinese original: 8,897 words.
