What this standard covers

This standard specifies a method for determining the total boron content in nuclear-grade boron carbide using acid-base titration. This standard applies to the determination of total boron content in nuclear-grade boron carbide powder and boron carbide chips.

Document data

International classification (ICS): 77.16.

Chinese classification (CCS): H16.

Estimated length of the Chinese original: 9,962 words.

Supersedes the earlier edition YS/T 423.1-2000.
