What this standard covers

This standard specifies the general requirements for safety in ferroalloy production, including site selection, plant layout and buildings/structures, and production safety requirements, and describes the corresponding verification methods. This standard applies to the safety management of design, production, and maintenance in ferroalloy, metallic chromium, metallic manganese, vanadium pentoxide, and high-silicon ferrosilicon production enterprises.

Document data

International classification (ICS): 77.100.

Chinese classification (CCS): H42.

Estimated length of the Chinese original: 18,159 words.

Supersedes the earlier edition AQ 2024-2010.
