1 Foreword

AQ 2025-2010 was issued by Ministry of Emergency Management on 14 November 2025 and has been in force since 1 November 2026.

The AQ prefix, without a suffix, marks a mandatory standard: within its scope, compliance is required.

The document runs to 10 pages in English translation.

2 Scope Preview

This standard specifies the management requirements for safe production in sintering and pelletizing plants, including plant layout, buildings and structures, production, and maintenance safety technical requirements. It describes the corresponding verification methods. This standard applies to the safety management of all aspects of sintering plants or pelletizing plants (or workshops), including design, acceptance, production, and maintenance.

AQ 2025-2010 falls under ICS 77.080, in the field of metallurgy.

This catalogue holds 4 other AQ standards in that field.

In this catalogue, AQ standards carry edition years from 2004 to 2026.

3 About this standard

Sector: Industrial Safety Standard

Issued by: Ministry of Emergency Management

English translation: about 10 pages (approximate)

Other editions:

AQ 2025-2025 (later edition)

Standards on related subjects:

YS/T 575.27-2023 - Methods for chemical analysis of bauxite - Part 27: Determination of elements content - Inductively coupled plasma atomic emission spectrometric method

YS/T 575.29-2023 - Methods for chemical analysis of bauxite - Part 29: Determination of available alumina and reactive silica

YS/T 575.24-2009 - Methods for chemical analysis of aluminum ores. Part 24: Determination of carbon content and sulfur content. Infrared absorption method

5 Classification and status

International classification (ICS): 77.080

Chinese Standard Classification (CCS): H 30

Prefix AQ: mandatory standard.
