What this standard covers

This standard specifies the method for determining the aluminum content in aluminum fluoride by EDTA titration. This standard is applicable to the determination of aluminum content in aluminum fluoride, with a determination range of 25.00% to 35.00%.

Document data

International classification (ICS): 71.100.10.

Chinese classification (CCS): H30.

Estimated length of the Chinese original: 9,966 words.

Supersedes the earlier edition YS/T 581.4-2006.
