What this standard covers

This standard specifies the overall requirements for the safety assessment of the main structure of aging offshore fixed production facilities, data collection, inspection, design level assessment, ultimate strength assessment, safety assessment report, rectification measures, and scrapping requirements. This standard applies to the main structure of offshore oil steel pile foundations and jacket production facilities, and does not apply to other structural forms of production facilities.

Document data

International classification (ICS): 75.180.99.

Chinese classification (CCS): E94.

Estimated length of the Chinese original: 21,223 words.
