What this standard covers

This standard specifies the safety requirements for oil unloading, refueling, oil metering, equipment use, maintenance and overhaul in gas stations. This standard applies to operations in gas stations, including operations involving refueling and gas refueling or hydrogen refueling joint construction stations. This standard does not apply to the operation of installed refueling devices and water refueling stations.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): B09.

Estimated length of the Chinese original: 8,836 words.
