### What this standard covers

This standard specifies the general requirements for cleaning operations of onshore oil and gas field storage tanks, as well as the safety requirements for pre-operation preparation, cleaning operations, equipment dismantling, inspection, and acceptance. This standard applies to the cleaning operations of crude oil storage tanks, sludge (water) tanks (pools), gas field water tanks (pools), mud tanks (pools), and other storage tanks in onshore oil and gas fields. This standard does not apply to the cleaning operations of special equipment such as boilers, pressure vessels, and pressure pipelines.

### Document data

International classification (ICS): 75.200.

Chinese classification (CCS): E16.

Estimated length of the Chinese original: 52,548 words.

Supersedes the earlier edition AQ/T 3057-2019.
