What this standard covers

This standard specifies the general provisions and compilation requirements for the special chapter on safety facility design for hazardous chemical construction projects (hereinafter referred to as the "Special Chapter"). This standard applies to the preparation of a dedicated section for newly built, renovated, or expanded projects involving the production and storage of hazardous chemicals, as well as chemical construction projects that generate hazardous chemicals (hereinafter collectively referred to as "construction projects"). Other chemical construction projects may refer to this standard for implementation.

Document data

International classification (ICS): 13.100.

Chinese classification (CCS): G09.
