What this standard covers

This standard specifies the general requirements for dust explosion prevention in wood processing systems, including equipment and facilities, inspection and maintenance of explosion-proof safety-related equipment and facilities, dust cleaning and management, and training requirements, and describes verification methods. This standard applies to the safety management of wood processing plants, engineered wood product plants, wood product manufacturing plants, wood flour plants, and bamboo, rattan, palm, and grass product manufacturing plants, as well as other wood product processing sites in various industries.

Document data

International classification (ICS): 13.100.
