What this standard covers

This standard specifies the basic requirements for safety technologies such as design of onshore shale gas wells under pressure, equipment installation and acceptance, construction operations, testing and emergency response. This standard applies to independent pressurized operation machines for onshore shale gas wells to lift and unload pipe strings.

Document data

International classification (ICS): 75.020.

Chinese classification (CCS): E10/19.

Estimated length of the Chinese original: 9,970 words.
