What this standard covers

This standard specifies the terms and definitions, requirements, test methods, inspection rules, marking, packaging, transportation and storage of two-way heat shrinkable polyester film for packaging. This standard is applicable to film materials which are prepared by a biaxial stretching process using a modified polyethylene terephthalate resin as a main raw material, and can be used alone or in combination with other films.

Document data

International classification (ICS): 55.040.

Chinese classification (CCS): A82.

Estimated length of the Chinese original: 8,889 words.
