### What this standard covers

This standard specifies the material requirements, process requirements and quality inspection of the inner and outer surfaces of steel pipes and fittings coated with anti-corrosion powder coatings. This standard is applicable to marine steel pipes, such as seawater, sewage, drinking water, oil, inert gas, etc., with a nominal diameter of 15 mm to 1,000 mm, a straight pipe length of not more than 6000 mm, and a straight pipe length of not more than 4000 mm. Plastic, steel pipe coating in other industries can also be used as reference.

### Document data

Chinese classification (CCS): U06.

Estimated length of the Chinese original: 12,123 words.

Supersedes the earlier edition CB/T 3366-1998.
