What this standard covers

This standard specifies the classification, requirements, test methods, inspection rules and signs, packaging and storage of marine pressure water tanks. This standard is applicable to the design, manufacture and acceptance of water tanks (excluding hot water tanks) for domestic and domestic plumbing systems and sanitary water pipes for ships and offshore structures with a design pressure of not more than 0.7 MPa.

Document data

Chinese classification (CCS): U42.

Estimated length of the Chinese original: 13,173 words.

Supersedes the earlier edition CB 455-1991.
