What this standard covers

This standard specifies the classification, requirements, test methods, inspection rules and marking, packaging, transportation and storage of electric heaters for marine fuel burners. This standard is applicable to the design, manufacture and acceptance of plate heaters for designing ships and marine structures with a design pressure not higher than 3.85 MPa and a maximum design temperature not exceeding 220°C C for heating fuel for burners. A plate heater for heating fluid fuel for other purposes can be referred to.

Document data

Chinese classification (CCS): U41.
