1 Foreword

CECS 144-2002 was issued by China Association for Engineering Construction Standardization on 30 September 2002 and has been in force since 1 December 2002.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 12 pages in English translation.

2 Scope Preview

This standard applies to: new construction, renovation and expansion civil and industrial construction projects using hydraulic control valves living water, production water, fire water and hot water supply projects. Construction of water works can refer to adopt, This standard does not apply to the following works, pH value of not more than 6. 5, and the use of galvanized steel water distribution domestic water project, raw water total hardness greater than 357mg/L and did not carry water treatment water supply projects.

CECS 144-2002 is filed under Chinese Standard Classification P40, in the field of engineering construction.

This catalogue holds 136 other CECS standards without an ICS number.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

3 About this standard
