1 Foreword

CECS 150-2003 was issued by China Association for Engineering Construction Standardization on 25 May 2003 and has been in force since 1 August 2003.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 57 pages in English translation.

2 Scope Preview

This standard specifies the technical parameters of coal-fired boilers, and the current national standard "boiler room design specifications" GB 50041 compared to the boiler capacity, rated pressure and medium temperature are different. According to the technical parameters proposed by the nine subprojects of the GEF project, the technical requirements suitable for this standard are obtained.

CECS 150-2003 is filed under Chinese Standard Classification P34, in the field of engineering construction.

This catalogue holds 136 other CECS standards without an ICS number.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

3 About this standard
