1 Foreword

CECS 167-2004 was issued by China Association for Engineering Construction Standardization on 1 December 2004 and has been in force since 1 February 2005.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 41 pages in English translation.

2 Scope Preview

This standard applies to: the span of not more than 30m, is not directly exposed to dynamic action enclosed building corrugated steel roof structure the design, fabrication, installation, inspection and maintenance, This standard does not apply to a strong corrosive, relative

humidity over the long term high and high temperature environments building.

CECS 167-2004 falls under ICS 91.080.10, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

3 About this standard

Sector: Construction Industry Standard

Issued by: China Association for Engineering Construction Standardization

English translation: about 41 pages (approximate)

Chinese original: about 61,674 characters

4 Related standards

Standards on related subjects:

GB 50205-2020 - Standard for acceptance of construction quality of steel structures

GB 50017-2017 - Standard for design of steel structures

GB 50661-2011 - Code for Welding of Steel Structures

CECS 458-2016 - Technical specification for CRB600H high ductility and high strength steel bar

CECS 410-2015 - Technical specification for stainless steel structures

CECS 158-2015 - Technical specification for membrane structures

5 Classification and status

International classification (ICS): 91.080.10

Chinese Standard Classification (CCS): P 26

Prefix CECS: association standard of the engineering construction sector, adopted voluntarily.
