## 1 Foreword

CECS 173-2004 was issued by China Association for Engineering Construction Standardization on 20 October 2004 and has been in force since 1 February 2005.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 32 pages in English translation.

## 2 Scope Preview

This standard applies to: basic seismic intensity is not greater than 8 degrees, the basic design earthquake acceleration is not greater than 0. 2g region, using cement polystyrene shell lattice concrete wall construction -, layers of not more than 6 layers residential construction design, construction and acceptance.

CECS 173-2004 falls under ICS 91.080.40, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

## 3 About this standard

Sector: Construction Industry Standard

Issued by: China Association for Engineering Construction Standardization

English translation: about 32 pages (approximate)

Chinese original: about 48,446 characters
