1 Foreword

CECS 236-2008 was issued by China Association for Engineering Construction Standardization on 15 April 2008 and has been in force since 1 July 2008.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 31 pages in English translation.

2 Scope Preview

This standard applies to non-microwave antenna or an antenna with a small microwave communication tower steel single tube design and construction quality acceptance. For the height of more than 60m single-tube steel communication tower, its construction quality acceptance criteria prior to implementation of the project should be determined according to the specialized demonstration project characteristics.

CECS 236-2008 falls under ICS 91.080.10, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.
