1 Foreword

CECS 304-2011 was issued by China Association for Engineering Construction Standardization on 18 August 2011 and has been in force since 1 October 2011.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 22 pages in English translation.

2 Scope Preview

This standard applies to seismic intensity of 8 degrees and 8 degrees below the region, to sandwich construction and acceptance as a general industrial and civil self-supporting systems and containment systems. This procedure does not apply in the range of prefabricated cold storage construction and acceptance.

CECS 304-2011 falls under ICS 91.120.10, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.
