1 Foreword

CECS 365-2014 was issued by China Association for Engineering Construction Standardization on 12 February 2014 and has been in force since 1 April 2014.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 60 pages in English translation.

2 Scope Preview

This standard specifies the non-seismic area and seismic intensity of 8 degrees and the following areas of clamping sprayed concrete sandwich shear building design, construction and acceptance for the building include: residential, commercial and resident

CECS 365-2014 falls under ICS 93.021, in the field of civil engineering.

This catalogue holds 11 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

3 About this standard
