Table of Contents

[Preview only]
1 General Provisions
2 Terms and Symbols
2.1 Terms
2.2 Symbols
3 Materials
3.1 General Requirements
3.2 Determination of Estimated Strength of Concrete with Dilled Cores
3.3 Drilled Core Correction Method
4 Major Equipments
4.2 Tension Cable and Anchor
4.3 Load
4.4 Detailing requirements
4.5 Artificial Filling Foundation Treatment by Heavy Tamping
5 Structural Calculation
5.2 Analysis of Initial State of Form
5.3 Analysis of Effects under Loads
5.4 Analysis of Pattern Cutting
5.5 Construction Quality Control and Monitor
5.6 Environmental Protection
6 Processing of Core or Technical Requirements of Specimen
6.2 Connection between Membrane Materials
6.3 Connection between Membrane and Rigid Boundary
6.4 Connection between Membrane and Flexible Boundary
6.5 Painting
7 Test of Core Specimen and Calculation of Compressive Strength
7.2 Inspection items
7.3 Qualification judgment
7.4 Maintenance
8 Erection
8.1 Erection of Steel Members and Tension Cables
8.2 Erection of Membrane Elements

8.3 Application of Pretension Force

8.4 Nondestructive Testing of Connection of Structural Steel Casting

8.5 Marking, Storage and Transport

9 Acceptance

1 Foreword

CECS 367-2014 was issued by China Association for Engineering Construction Standardization on 20 March 2014 and has been in force since 1 July 2014.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 25 pages in English translation.

2 Scope Preview

This standard is applicable to the design, construction acceptance and operation management of the combined oxidation ditch process in urban sewage and industrial wastewater treatment project. The construction of the oxidation ditch should be based on process requirements to set up online monitoring and control system to achieve operational management automation. The treatment and disposal of waste gas, waste water, waste residue, noise and other pollutants generated during the construction and operation shall be in accordance with the relevant national environmental protection regulations and the relevant relevant standards The relevant provisions to prevent secondary pollution. In addition to this standard, it should meet the requirements of the relevant national standards.

CECS 367-2014 falls under ICS 91.140.80, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

3 About this standard

Issued by: China Association for Engineering Construction Standardization

English translation: about 25 pages

Chinese original: about 38,347 characters

4 Related standards

Standards on related subjects:

GB/T 41494-2022 - Aluminum alloy lining plastics pipes and fittings

CJ/T 244-2016 - Water quality standards for swimming pool

CJ/T 225-2011 - Metal reinforced polyethylene (PE) spirally corrugated pipe for underground sewer

CECS 426-2016 - Technical specification for application of reduced-pressure backflow preventer

CECS 425-2016 - Technical specification for application of water hammer arrestor

CECS 363-2014 - Technical specification for WAB building same-floor maintenance drainage system

5 Classification and status

International classification (ICS): 91.140.80

Chinese Standard Classification (CCS): P 42

Prefix CECS: association standard of the engineering construction sector, adopted voluntarily.
