1 Foreword

CECS 396-2015 was issued by China Association for Engineering Construction Standardization on 12 February 2015 and has been in force since 1 June 2015.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 48 pages in English translation.

2 Scope Preview

This Standard applies to non-seismic area and the seismic intensity of 8 degrees and the following areas, general industrial and civil construction works of non-load-bearing wall and the inner peripheral wall of the design, manufacture, installation and acceptance. Peripheral siding application height should not exceed, manufacture, installation and acceptance. Peripheral siding application height should not exceed 100m.

CECS 396-2015 falls under ICS 91.120.10, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.
