1 General Provisions
2 Terms and Symbols
2.1 Terms
2.2 Symbols
3 Materials
3.1 General Requirements
3.2 Determination of Estimated Strength of Concrete with Dilled Cores
3.3 Drilled Core Correction Method
4 Major Equipments
4.2 Tension Cable and Anchor
4.3 Load
4.4 Detailing requirements
4.5 Artificial Filling Foundation Treatment by Heavy Tamping
5 Structural Calculation
5.2 Analysis of Initial State of Form
5.3 Analysis of Effects under Loads
5.4 Analysis of Pattern Cutting
5.5 Construction Quality Control and Monitor
5.6 Environmental Protection
6 Processing of Core or Technical Requirements of Specimen
6.2 Connection between Membrane Materials
6.3 Connection between Membrane and Rigid Boundary
6.4 Connection between Membrane and Flexible Boundary
6.5 Painting
7 Test of Core Specimen and Calculation of Compressive Strength
7.2 Inspection items
7.3 Qualification judgment
7.4 Maintenance
8 Erection
8.1 Erection of Steel Members and Tension Cables
8.2 Erection of Membrane Elements

8.3 Application of Pretension Force

8.4 Nondestructive Testing of Connection of Structural Steel Casting

8.5 Marking, Storage and Transport

9 Acceptance

1 Foreword

CECS 425-2016 was issued by China Association for Engineering Construction Standardization on 7 March 2016 and has been in force since 1 June 2016.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 19 pages in English translation.

2 Scope Preview

This standard applies to the selection, installation, installation, acceptance and maintenance of water hammer absorbers for industrial water supply projects, urban water supply projects, fire water supply works, construction water supply projects and reclaimed water supply projects. Water hammer absorber should comply with the relevant industry standard "building water hammer absorber" CJ/T 300 of the relevant provisions. In addition to this standard, the selection, setting, installation, acceptance and maintenance of the water hammer absorber shall conform to the existing national standard "Code for the design of construction water supply and drainage" GB 50015 and "Construction quality acceptance standard for building water supply and drainage and heating engineering" GB 50242 of the relevant rules

CECS 425-2016 falls under ICS 91.140.60, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.

3 About this standard

Issued by: China Association for Engineering Construction Standardization

English translation: about 19 pages

Chinese original: about 29,269 characters

4 Related standards

Standards on related subjects:

GB/T 41494-2022 - Aluminum alloy lining plastics pipes and fittings

CJ/T 244-2016 - Water quality standards for swimming pool

CJ/T 225-2011 - Metal reinforced polyethylene (PE) spirally corrugated pipe for underground sewer

CECS 451-2016 - Design procedure of upstream flow filter

CECS 423-2016 - Technical specification for compression and adhesive collected light gauge stainless steel pipes

CECS 426-2016 - Technical specification for application of reduced-pressure backflow preventer

5 Classification and status

International classification (ICS): 91.140.60

Chinese Standard Classification (CCS): P 42

Prefix CECS: association standard of the engineering construction sector, adopted voluntarily.
