1 Foreword

CECS 435-2016 was issued by China Association for Engineering Construction Standardization on 18 May 2016 and has been in force since 1 September 2016.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 47 pages in English translation.

2 Scope Preview

This standard is applicable to the design, construction, acceptance and maintenance of the combined air valve used in the exhaust system of tunneling works. Combined wind valve in the tunnel project application, in addition to the provisions of this standard should be consistent with the existing national standards.

CECS 435-2016 falls under ICS 91.140.30, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.
