1 Foreword

CECS 444-2016 was issued by China Association for Engineering Construction Standardization on 29 June 2016 and has been in force since 1 October 2016.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 43 pages in English translation.

2 Scope Preview

This standard applies to the seismic intensity of 6 degrees to 8 degrees of reinforced mechanical connection assembly of concrete structure design, and the joint site inspection, installation and acceptance.

CECS 444-2016 is filed under Chinese Standard Classification P 25, in the field of engineering construction.

This catalogue holds 136 other CECS standards without an ICS number.

In this catalogue, CECS standards carry edition years from 1988 to 2016.
