1 Foreword

CECS 458-2016 was issued by China Association for Engineering Construction Standardization on 16 December 2016 and has been in force since 1 April 2017.

The CECS prefix marks a association standard of the engineering construction sector, adopted voluntarily.

The document runs to 36 pages in English translation.

2 Scope Preview

This standard applies to industrial and civil construction in the use of CRB600H high ductility high strength steel structure design, construction and quality acceptance.

CECS 458-2016 falls under ICS 91.080.10, in the field of construction materials and building.

This catalogue holds 144 other CECS standards in that field.

In this catalogue, CECS standards carry edition years from 1988 to 2016.
