Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard is CJ/T 171-2002 "urban environmental sanitation property data collection table and database structure" revision, and CJ/T 171-2002 compared to the main technical changes as follows.

- Increasing food waste disposal information data items (see Chapter 10);
- Added building waste treatment plant information data items (see Chapter 11);
- Defective dung station information data item deleted (see Chapter 10 of 2002 edition);
- Modify the name of environmental sanitation facilities.

Domestic waste compression stations (see Chapter 5 of the 2002 edition) are now converted to domestic waste collection stations (see Chapter 6).

The garbage collection station (see Chapter 6 of the 2002 edition) is now replaced by a collection station for domestic waste biological treatment (see Chapter 7).

The clearing house workers 'places of work (see Chapter 13 of the 2002 edition) are now replaced by sanitation workers' places of work (see Chapter 15).

This standard proposed by the Ministry of Housing and Urban Standard and Design Institute.

This standard by the Ministry of Housing and Urban Construction City Environmental Health Standardization Technical Committee.

This standard was drafted. Shanghai Green and City Management Information Center, Shanghai Environmental Health Engineering Design Institute.

1 Scope

This standard specifies the scope of environmental sanitation facilities and attribute data description, collection and database structure.

This standard applies to the environmental health facilities attribute data collection, storage, processing and exchange.
