What this standard covers

This standard specifies the classification and marking, general provisions, requirements, test methods, inspection rules, marking, packaging, transportation and storage of self-operated flow control valves (hereinafter referred to as control valves). This standard is applicable to self-operated flow control valves used in heating (cold) systems with medium inlet pressure less than 2.5 MPa, temperature of 4°C to 150°C, and water as medium.

Document data

International classification (ICS): 91.140.10.

Chinese classification (CCS): P46.

Estimated length of the Chinese original: 10,175 words.

Supersedes the earlier edition CJ/T 179-2003.
