What this standard covers

This standard specifies the garbage field of high -density polyethylene geomembrane classification, requirements, test methods, test frequency, marking, labeling, packaging, transportation and storage. This standard applies to landfill seepage, closure and other projects that are used to neutralize the (high) density polyethylene resin as the main raw material, adding various additives produced by the high-density polyethylene geomembrane.

Document data

International classification (ICS): 93.020.

Chinese classification (CCS): P00.

Estimated length of the Chinese original: 35,353 words.
