### What this standard covers

This standard specifies the steady-state heat-resistant polyethylene plastic aluminum composite pipe definitions, symbols, abbreviations, conditions of use level, product classification, pipe series S value choice, materials, technical requirements, test methods, inspection rules, marking, packaging, transportation and storage. This standard applies to hot and cold water piping systems (including industrial and commercial hot and cold water, drinking water and hot water heating, central air conditioning systems, etc.) used in aluminum steady PE-RT plastic pipe. This standard does not apply to non-aqueous media fire-extinguishing systems and fluid delivery systems.

### Document data

International classification (ICS): 91.140.60.

Chinese classification (CCS): P42.

Estimated length of the Chinese original: 17,120 words.

Adopted international standard: ISO/DIS 22391, NEQ.
