**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

CJ/T 277-2008

**Survey and statistical method for area of urban road under
cleaning program**

城市道路清扫面积测算方法

(English Translation)

Issued on: September 22, 2008

Implemented on: February 1, 2009

**Issued by: Ministry of Housing and Urban-Rural Development of the
People's Republic of China**

Table of Contents

Foreword

1 Scope

2 Normative references

3 Terms and definitions

4 Requirements

4.1 The amount of measurement and bias

4.2 Determination of length and width

4.3 Determination of road sections

4.4 Measurement Methods

4.5 Measuring equipment

5 Calculation and Statistics

5.1 The basic calculation method

5.2 Sub-calculation method

5.3 Cleaning area statistics

5.4 Cross-hatch area calculation

5.5 The length of the starting and ending point of the road

5.6 Separator (Facilities)

5.7 Harbor Stations

5.8 Special section processing

5.9 Data Statistics

6 Site records and data collation

Appendix A (informative) on-site measurement of job records table

Appendix B (informative) x x x x x x District urban road sweeping area statistics

Foreword

This standard Appendix A, Appendix B is an informative annex.

This standard proposed by the Ministry of Housing and Urban Standard and Design Institute.

This standard by the Ministry of Housing and Urban-township sanitation standard technology focal point Shanghai Municipal Environmental Health Administration centralized.

This standard editor unit. Wuhan Environmental Health Scientific Research and Design

Institute.

This standard reference unit. Huazhong University of Science and Technology School of Environmental Science and Engineering, Shanghai Environmental Engineering Design and Research Institute, Beijing Environmental Health Health Design Institute, Zhengzhou Institute of Environmental Health Sciences.

1 Scope

This standard specifies the urban road sweeping area measurement, calculation, statistical methods and measurement tools.

This standard applies to urban roads sweeping, cleaning area, sprinkler area calculations, operations and statistics. City Square and green space cleaning, Cleaning area can refer to the use of estimates.

2 Normative references

The following documents contain provisions which, through reference in this standard and become the standard terms. For dated references, follow Some amendments (not including errata content) or revisions do not apply to this standard, however, to encourage the parties to reach an agreement based on this standard Whether you can use the latest version of these files. For undated references, the latest version applies to this standard.
