CJ

**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

CJ/T 340-2011

Replacing CJ/T 340-2011

**Planting soil for greening
(English Translation)**

Issued on: June 28, 2016

Implemented on: August 1, 2016

**Issued by: Ministry of Housing and Urban-Rural Development of the
People's Republic of China**

Table of Contents

Foreword
1 Scope
2 Normative references
3 Terms and definitions
4 Requirements
5 Samples sent samples and testing methods
6 Inspection rules
7 Soil improvement repair and quality maintenance
Appendix A (Normative) soil sampling sample
Appendix B (Normative) Determination of gravel content screening method
Appendix C (Normative) Seed germination index experimental method

Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard replaces CJ/T 340-2011 "green planting soil." this standard revision of CJ/T 340-2011 "greening soil", the main technical changes compared with CJ/T 340-2011 are as follows.

- Increase the general requirements of soil quality (see 4.2.1);
- Increased soil fertility requirements (see 4.2.2);
- Increased soil quality infiltration requirements (see 4.2.3);
- Increasing the technical requirements of soil obstruction factor (see 4.2.4);
- Increase the determination of soil fertility rules (see 6.3.2);
- Increasing the rules for determining soil infiltration (see 6.3.3);
- Increase the judgment rules of soil obstacle factor (see 6.3.4);
- Increase the determination of other soil pollution rules (see 6.3.5.2);
- Increased soil remediation and quality maintenance (see 7, 7.1 and 7.2);
- Increased according to the distribution of plant roots soil sampling method (see Appendix A.5.3);
- Supplementary soil pollution control requirements other than the potential of heavy

metals (see 4.2.5.2);

--- Added soil testing methods (see 5.2);

--- Modify the basic requirements of effective soil thickness (see 4.1.2);

--- Modify the basic requirements of soil disinfection (see 4.1.5);

--- Modify the environmental quality of soil technical requirements (see 4.2.5);

--- Modify the soil testing methods (see 5.2);

--- Modify the soil testing agency requirements (see 6.2);

--- Modify soil judgment rules (see 6.3, 6.3.1, 6.3.5 and 6.3.5.1);

--- Modify the requirements of soil samplers and witnesses (see Appendix A.1.1);

--- Modify the soil sampling density requirements (see Appendix A.3.1).

This standard proposed by the Ministry of Housing and Urban Standard and Design Institute.

This standard by the Ministry of Housing and Urban Landscape Architecture Standardization Technical Committee.

This standard was drafted. Shanghai Academy of Landscape Planning, Shanghai Green and City (Forestry) Engineering Management Station, Beijing Garden Academy of Science, Guangzhou Academy of Forestry and Garden Science.

1 Scope

This standard specifies the terms and definitions of afforestation soil, requirements, sample sampling and testing methods, inspection rules, improved repair and quality maintain.

This standard applies to the general green planting soil or green conservation soil.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version applies to this article Pieces. For undated references, the latest edition (including all amendments) applies to this document.

GB/T 6682 analytical laboratory water specifications and test methods Representation and determination of rules for repair of numerical values and limit values GB/T 8170-2008 Soil quality - Determination of total mercury - Cold atomic absorption spectrophotometric method Soil quality - Determination of copper and zinc - Flame atomic absorption spectrophotometric method Soil quality - Determination of nickel - Flame atomic absorption spectrophotometric method GB/T 17140 Soil quality - Determination of lead and cadmium - KI-MIBK extraction by atomic absorption spectrophotometry Soil quality - Determination of

lead and cadmium - Graphite furnace atomic absorption spectrophotometric method GB/T 17141 GB/T 22105.2 Soil quality - Determination of total mercury, total arsenic and total lead - Atomic fluorescence spectrometry - Part 2.
