What this standard covers

This standard specifies the type, type, structural characteristics and classification, basic parameters, materials, requirements, test methods, inspection rules, marking, packaging, transportation and storage of circulating water pumps (hereinafter referred to as pumps) for swimming pools and spas. This standard applies to single-stage end suction plastic centrifugal water pump and metal centrifugal water pump unit in swimming pool, spa pool, hot spring pool and hot water massage bath. The water temperature of the plastic water pump should not exceed 50°C, and the water temperature of the metal water pump should not exceed 100°C.
