INDUSTRY STANDARD OF THE PEOPLE'S REPUBLIC OF CHINA

CJJ/T 34-2022

Design standard for urban heating network

城镇供热管网设计标准

(English Translation)

Issued on: April 29, 2022 **Implemented on: August 1, 2022**

Issued by: Ministry of Housing and Urban-Rural Development of the People's Republic of China

Table of Contents

1 General provisions
2 Terms
2.0.1 Heating network
2.0.2 Transmission mains
2.0.3 Distribution pipelines
2.0.4 Long distance pipeline
2.0.5 Block hot-water heating network
2.0.6 Dynamical hydraulic analysis
2.0.7 Heating system with multi-heat sources
2.0.8 Independently operation of multi-heat sources
2.0.9 Separately operation of multi-heat sources
2.0.10 Pooled operation of multi-heat sources
2.0.11 Minimum heating rate
2.0.12 Installation without compensator
2.0.13 Heating substation
2.0.14 Boosting pump station
2.0.15 Pressure isolation station
2.0.16 Combined type expansion joint
3 Heat consumption
3.1 Heating load
3.2 Annual heat consumption
4 Heating medium
4.1 Heating mediums selection
4.2 Parameters of heating medium
4.3 Water quality
5 Heating network types
6 Heat-supply regulation
7 Hydraulic calculation
7.1 General requirements
7.2 Design flow
7.3 Parameters of calculation
7.4 Pressure state

https://chinastandards.org/standards/cjj-t-34-2022

7.5 Pump selection
8 Network layout and bury method
8.1 Network layout
8.2 Bury method of pipeline
8.3 Materials and connecting of pipeline
8.4 Compensation of thermal expansion
8.5 Accessories and components
9 Calculation of stresses and actions

1 Foreword

CJJ/T 34-2022 was issued by Ministry of Housing and Urban-Rural Development of the People's Republic of China on 29 April 2022 and has been in force since 1 August 2022.

The CJJ/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 110 pages in English translation.

2 Scope Preview

This standard applies to new, expanded or rebuilt urban heat supply pipes from the heat source outlet to the heat inlet of the building with a design pressure less than or equal to 2.5MPa, a design temperature of the hot water medium of less than or equal to 200°C, and a design temperature of the steam medium of less than or equal to 350°C Web design.

CJJ/T 34-2022 is filed under Chinese Standard Classification P 46, in the field of engineering construction.

This catalogue holds 97 other CJJ/T standards without an ICS number.

In this catalogue, CJJ/T standards carry edition years from 1993 to 2023.

3 About this standard

Issued by: Ministry of Housing and Urban-Rural Development of the People's Republic of China

English translation: about 110 pages

Chinese original: about 167,136 characters

4 Related standards

Standards on related subjects:

GB/T 21087-2020 - Energy recovery ventilators for outdoor air handling

CJ/T 395-2012 - Gas-fired heating and hot water condensing combi-boilers

GB 25034-2010 - Gas-fired heating and hot water combi-boilers

CJ/T 25-2018 - Hand flow adjusting valves for heating

CJJ 88-2014 - Technical specification for operation and maintenance of city heating system

CJJ 28-2014 - Code for construction and acceptance of city heating pipelines

5 Classification and status

Chinese Standard Classification (CCS): P 46

Prefix CJJ/T: recommended standard.
