## 2 Scope Preview

This standard is applicable to guide certification bodies to conduct energy management system (hereinafter referred to as EnMS) audit time accounting, including the determination of the number of effective personnel, the determination of complexity, and the determination of audit time, so as to ensure the accuracy of the key factors that affect the audit time. Understanding and application are consistent. When CNAS conducts accreditation review on certification bodies, it collects the evidence of the certification body's application of the energy management system audit time accounting method in the certification process to determine whether the certification body has arranged enough audit time to ensure the
