What this standard covers

This standard specifies the management principles and responsibilities for archives of national major scientific and technological infrastructure (hereinafter referred to as "major facilities"). It outlines requirements and methods for the generation, collection, organization, and filing of documentation; the acceptance (review), preservation, statistics, utilization, and transfer of archives; and the disposal of archives from decommissioned major facilities. This document applies to archive management activities for major facilities; archive management for other major scientific and technological infrastructure may refer to this standard.

Document data

International classification (ICS): 01.140.20.

Chinese classification (CCS): A14.

Estimated length of the Chinese original: 28,210 words.
