1 Foreword

DB/T 35-2009 was issued by China Earthquake Administration on 9 February 2009 and has been in force since 1 June 2009.

The DB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 13 pages in English translation.

2 Scope Preview

This standard specifies the method of seismic electromagnetic disturbance observer and the observed object requirements, observation principle, observation stations, networking observation, produce environmental observation and observation data. This standard applies to earthquake monitoring and forecasting and scientific research related to electromagnetic disturbance observer.

DB/T 35-2009 falls under ICS 91.120.25, in the field of construction materials and building.

This catalogue holds 94 other DB/T standards in that field.

In this catalogue, DB/T standards carry edition years from 2000 to 2026.

3 About this standard

Issued by: China Earthquake Administration

English translation: about 13 pages

Chinese original: about 20,234 characters

4 Related standards

Standards on related subjects:

GB/T 17742-2020 - The Chinese seismic intensity scale

DB/T 59-2015 - Technical requirements for seismic observation instruments joining the network - Seismic intensity meter

DB/T 32.1-2020 - Technical requirements of instruments in network for earthquake monitoring. Underground fluid observation instruments - Part 1: Pressure instrument for water level

DB/T 37-2010 - Technical specifications for design of earthquake monitoring network. Geomagnetic observation network

DB/T 36-2010 - Technical specifications for design of earthquake monitoring network. Geoelectric observation network

5 Classification and status

International classification (ICS): 91.120.25

Chinese Standard Classification (CCS): P 15

Prefix DB/T: recommended standard.
