

**INDUSTRY STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

DB/T 40.1-2010

**Technical specification for design of earthquake monitoring network.
Crustal deformation observation network. Part1: Crustal deformation
observation network for permanent stations
(English Translation)**

Issued on: March 12, 2010

Implemented on: June 1, 2010

Issued by: China Earthquake Administration

What this standard covers

This standard specifies the design principles, structure and observation items of the fixed station deformation observation network; specifies the structure, function and technology of the ground tilt observatory network, the ground strain observation network, the global navigation satellite system reference network and the fixed station deformation observation network center Claim. This standard is applicable to the design of the fixed station deformation observation network of the crustal deformation observation network in the Chinese seismic network.

Document data

Chinese classification (CCS): P15.

Estimated length of the Chinese original: 12,191 words.
