1 Foreword

DB/T 76-2018 was issued by China Earthquake Administration on 26 December 2018 and has been in force since 1 March 2019.

The DB/T prefix marks a recommended standard. It is not law in itself: it becomes binding when a contract names it, when a regulation or a mandatory standard refers to it, or when a producer declares conformity with it.

The document runs to 7 pages in English translation.

2 Scope Preview

This standard specifies the content, method and result expression of highway seismic damage assessment based on remote sensing. This standard applies to the use of remote sensing to carry out road seismic damage assessment.

DB/T 76-2018 falls under ICS 91.120.25, in the field of construction materials and building.

This catalogue holds 94 other DB/T standards in that field.

In this catalogue, DB/T standards carry edition years from 2000 to 2026.

3 About this standard

Issued by: China Earthquake Administration

English translation: about 7 pages

Chinese original: about 10,116 characters

4 Related standards

Standards on related subjects:

GB/T 17742-2020 - The Chinese seismic intensity scale

DB/T 60-2015 - Specification for the construction of seismic stations - Stations for rapid reporting of seismic intensity and earthquake early warning

DB/T 86-2021 - Identification of seismic waveform data channel

DB/T 85-2021 - Coding rules for earthquake monitoring network

DB/T 81-2020 - Active fault survey - Paleoseismic trenching

5 Classification and status

International classification (ICS): 91.120.25

Chinese Standard Classification (CCS): P 15

Prefix DB/T: recommended standard.
